Creating a GST invoice

PROBLEM VS SOLUTION

PROBLEM

Calculating GST on an item is a bit more involved as you also need to divide the GST into CGST & SGST if you are selling within your state, or keep the whole as IGST if you are selling to other state.

SOLUTION

For a real business, you also need to store all invoices with a unique serial no. You need to print billing and shipping address on your invoice. We also upload the pdf with the final details.
